South Bend 24, Indiana

Issued for Information of Producers
Who Are Not Members of Cooperative Associations

Vol. V, No. 9

September 1961

AUGUST UNIFORM PRICE \$ 4.13

Dairy farmers will receive a uniform price of \$4.13 for August 1961 deliveries of Grade A milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. The uniform price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7.3 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This minimum price is subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge.

PRODUCER RECEIPTS

Producer receipts are down about 34 percent from a year ago, but the Class I sales are down 37 percent, so the Class I utilization is not as high as it was a year ago. This is because we lost part of our market to the Indianapolis and Fort Wayne markets. When we compare the daily herd production with that of August 1960, we find an increase of 59 pounds per producer per day. This is a continuing trend of fewer producers with increasing production per producer. In comparison with July, the daily production is down 3 percent.

CLASS I SALES

Sales of Class I products are 4.5 percent higher than in July 1961. There was approximately 160,000 pounds of Class I milk sold outside the marketing area in bulk to non pool handlers, which accounts for some of the increase in Class I sales over July. July and August are usually the lowest months in Class I sales for the year, and in September, Class I should show another increase.

BASE MAKING PERIOD

Beginning with the September 1961 delivery period and continuing through December 1961, producers will be making a base for the spring months of April, May, June, and July 1962. A record is kept by the market administrator of each producer's production for the four fall months and divided by the number of days shipped, to compute a daily base. A producer must ship at least 90 days during the base making period to establish a base. An explanation of the option to relinquish your base and take new producer status will be printed in a later issue of this market information.

CLASS I PRICE

The Class I price for the September 1961 delivery period will be \$4.41 per hundredweight for 3.5 percent milk. This price was computed by adding \$1.30 per hundredweight to the average condensery pay price (\$3.17) and deducting the 6 cent supply-demand adjustment. The supply-demand adjustment for the October 1961 delivery period will be a minus 4 cents.
